Professional Experience

Infosys Limited

Pune, Maharashtra

Senior System Engineer

November 2021 – Present

- Developed multiple custom components for enhanced application performance and reduced code duplication across various sections of the application.
- Utilized SonarQube to identify and rectify code quality issues and security vulnerabilities.
- Conducted comprehensive code reviews to enforce best practices and ensure a clean, scalable codebase.
- Implemented a caching mechanism, resulting in a 40% faster application load time.
- Created custom components to enhance code readability and reduce overall code size.
- Contributed to an agile project, applying agile-driven strategies that enhanced team performance in various activities.

Projects

- Personal Portfolio - [Yadnesh Portfolio](#) ; Github - [Portfolio code](#)
 - Developed a dynamic Personal Portfolio website using React.js and Tailwind CSS to showcase professional achievements and skills.
- Weather app - [My Weather](#) ; Github - [Weather App code](#)
 - Developed a responsive weather forecast application with React.js and Tailwind CSS, integrating real-time weather data from an API while implementing error handling for smooth performance.

Leadership & Activities

- Led scrum teams for front-end projects, working closely with teams to create efficient websites.
- Mentored junior developers, aiding in their onboarding and enhancing team efficiency.

Awards & Certification

- Infosys Certified Front End Web Developer Certification.
- Infosys Certified Java SE 8 Programmer.
